Country Progressing In Spite of Strikes

WASHINGTON, Sept a - Despite industrial difficulties, the country's economic progress is continuing steadily toward normal conditions, commerce department declared today in a survey or the general

"No clearer demonstration could be asked," the department said, "to indicate the soundness of the fundamental conditions underlying the present business revival than the persistence with which commerce and industry have progressed in the face of recent serious obstacles. The extreme serious labor difficulties through which we are now passing would, unier many conditions have completely demoralized business, instead, real progress continues to be made.

There is reason to suppose that the economic losses occasioned by the coal and railroad strikes will make themselves tell for some months to come. Disturbances of this character affecting basic industries cannot take place without having to be paid for in the long run. It is possible that the full force of these losses can be felt more in the future.
